#### **DETAILED ACTION**

### Response to Amendments

1. The reply filed 6/24/03 consists of amendments to claim 20, cancellation of claims 21-22, addition of new claims 28-29 and remarks related to rejection of claims. The claims are not allowable as explained below.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claim 29 is rejected under 35 U.S.C. 102(b) as being anticipated by Ogden et al (EP 0 707 321).

Ogden (Figures 1-6, and Page 3, lines 5-15) shows a cable with a plurality of fine wires 15 welded to a contact piece with a screw hole.

### Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 20, 23-24 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogden et al (EP 0 707 321) in view of Budnick (4,118,097).

Ogden (Figures 1-6, and Page 3, lines 5-15) shows a cable with a plurality of fine copper wires 15 wherein a further section is formed at both ends of a central portion by pressing and welding the strands together which is welded to one side of a contact piece (an end portion of an apparatus, not shown). The further section extends at angle (0, 180 or 360 degrees) to the longitudinal axis of the cable. But Ogden does not show an insulator disposed over the central portion of the cable and the further portion. The use of insulators over an electrical wire or connection is common knowledge. Budnick (Figure 4) shows a battery cable 20 with an insulator 38 over a strand of copper wires 30 with a further section connected to only one side of a contact piece 40 and an insulator 44 over the further section. Since the end of the Ogden's cable is flattened, it is most logical and inherent to connect the Ogden's flattened end to a flat contact piece of the apparatus on only one side as shown by Budnick. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to provide to provide an insulator over the central portion and the further section of the Ogden's cable because it will provide protection against electrical shock and leakage as is well known and common knowledge.

### Response to Arguments

6. Applicant's arguments with respect to claims 20 have been considered but are moot in view of the new ground(s) of rejection. Ogden further discloses that the bump in the central portion of the cable prevents wicking of solder beyond the attachment

Page 4

point (See column 4, lines 24-37). Hence, damage to the insulator over the central portion is prevented.

#### Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

#### **Contact Information**

8. Any correspondence to this action may be mailed to:

Commissioner for Patents Post Office Box 1450 Alexandria, VA 22313-1450

Hand-delivered responses should be brought to:

Crystal Plaza 4, Fourth Floor (receptionist)

Art Unit: 2839

## 2201 South Clark Place, Arlington, Virginia

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chandrika Prasad whose telephone number is (703) 308-0977.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild, can be reached at (703) 308-2710. The fax number for this Group is (703) 872-9318 (general) and (703) 872-9319 for after-final.

Any inquiry of a general nature or relating to the status of this application or processing should be directed to the Group receptionist whose telephone number is (703) 308-1782.
